Geometrica

PRIVATE VIEW: 21 February, 6 – 9pm

22 February - 28 March 2018

Tues – Sat, 11am – 6pm

Tristan Hoare is delighted to present *Geometrica*, an exhibition curated with Omar Mazhar that focuses on works of art inspired and shaped by geometry, the golden ratio and the unseen universal blueprint. Themes considered within the exhibition include pattern, repetition, rhythm and proportion, with the works spanning many generations and exploring different materials and approaches within this common thread.

The Oxford English Dictionary defines Geometry as: 'the branch of mathematics concerned with the properties and relations of points, lines, surfaces, solids, and higher dimensional analogues'. If we remove the word 'mathematics' anyone guessing what was being described might be forgiven for thinking it was art. Elements in the description are present in the vast majority of works of art. One may also argue that the aim of many artists has been to access 'higher dimensional analogues' and that great artworks achieve it! In exploring the exhibition you will see art that is the result of the artist working more literally within a geometric framework but also art wherein the connection is more subtle, coincidental or inferred.

Geometrica is not an attempted survey of Geometric art but an inquiry into an artistic and spiritual scaffolding on which all art relies. The aim has been to collect, arrange and connect works with visual manifestations of Geometry and part of the challenge of such a huge theme has been to decide what not to include!

Tristan Hoare & Omar Mazhar

ABOUT THE GALLERY:

Tristan Hoare was based in Notting Hill at Lichfield Studios from 2009 to 2014. In September 2016, Tristan Hoare opened its new premises at Six Fitzroy Square. Tristan Hoare represents both emerging and established contemporary artists.
